BUTTERFLY QUALITY

WITH PASSION TOWARDS PERFECTION

Butterfly's very own development and production of blades and rubbers in Japan has established a new standard for quality among manufacturers in table tennis. From the selection of materials up to the packaging of the finished product, men and machine alike make sure only products meeting our demands for highest quality arrive at the store.

In the production of blades, Butterfly aptly combines the efficiency of industrial production and the dedicated value of traditional Japanese handcrafting. Setting off the production of blades is always a rigorous selection of high quality raw wood material, where our professionals know that wood can be as unique as any natural material. Only the most precious wood is used and cut into flat boards – so called veneers – traditionally with a fine blade, where a saw would produce too much waste. Much like the whole production, each step is watched by Butterfly blade experts, making sure wood veneers with impurities are not selected for further processing.

Butterfly aptly combines the efficiency of industrial
production and the dedicated value of traditional
Japanese handcrafting

Every Butterfly blade consists of veneers of different wood types, specially selected and in some cases enhanced with artificial fibers that are specifically invented for table tennis. All of these components work in harmony towards creating an individual blade with unique playing characteristics. This is made possible by a dedicated Butterfly staff of material composition experts and our long standing experience with designing, testing and producing blades for over 65 years.

A sometimes overlooked, yet all the more important component of a blade is the gluing of veneers, where a special glue, patience and experience is needed to yield the best results, while the specific temperature, pressure and glue is a well-kept company secret. The finished, yet still raw blade boards are once again thoroughly checked for correct thickness and gluing results before being precisely cut and under careful sanding brought into the well-known shape of a table tennis blade.

Every Butterfly blade starts with an idea and is finished by the work of dedicated hands, by professionals of their trade under the watchful eye of thorough quality control making sure, every product holds up to the high standard set by our philosophy at Butterfly, our passion for perfection.

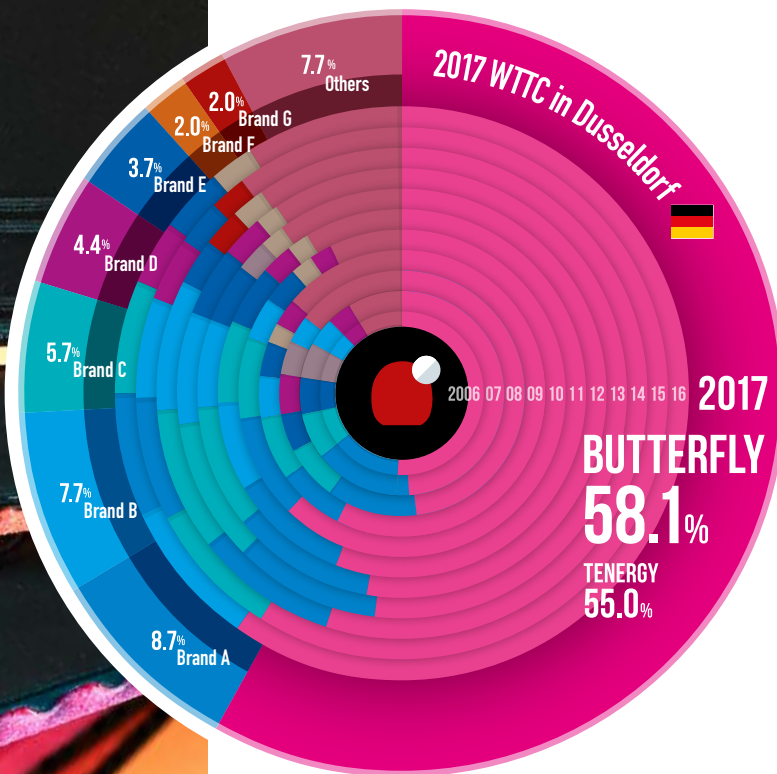

Butterfly - Table Tennis for you.

Every Butterfly blade starts with an idea and is finished by the work of dedicated hands

RUBBERS

CHOICE OF THE WORLD'S BEST PLAYERS

The high demands for quality made visible in numbers: At the World Table Tennis Championships in Düsseldorf 2017, almost 60% of the athletes have been using Butterfly blades or rubbers, with more than half of all athletes playing at least one TENERGY rubber on their racket. This data shows Butterfly being the leading manufacturer in professional table tennis. But not only professionals – in fact, players of all levels of play have grown to trust and rely on the exceptional quality promised by Butterfly equipment.

FEEL THE POWER OF SPRING SPONGE

The ball trajectory of a topspin shot hit with TENERGY 05 is a pronounced curve, due to heavy spin. This enables a most precise active topspin play. The trajectory of TENERGY 64 is more flat and low in comparison, resulting in a shorter travel distance and higher speed of the ball. The trajectory of TENERGY 80 is exactly in between 05 and 64, as are its playing characteristics.

The main difference between rubbers of the TENERGY series is the complex pimple structure with variations in length, width and distance. The long, thinner pimples of TENERGY 64 enable speed and a softer touch, whereas the broad, short pimples of TENERGY 25 in turn generate a harder and precise touch sensation. The pimple structure of TENERGY 05 is specifically tailored towards high amounts of spin. TENERGY 80 mixes the width of pimples from TENERGY 05 and length of pimples from TENERGY 64, resulting in playing characteristics balanced between TENERGY 05 and 64.

TENERGY 05

TENERGY 25

TENERGY 64

TENERGY 80

Spring Sponge
HIGH TENSION

TENERGY 05

FOR MAXIMUM SPIN

TENERGY provides a unique feeling, using a combination of a High Tension rubber and a tacky surface. Pimples with code no. 05 were adopted; a combination which allows a great deal of spin to be imparted. TENERGY 05 enables a full range of topspin play to be produced and is the most successful rubber worldwide.

Spring Sponge
HIGH TENSION

TENERGY 05 FX

FOR SPIN WITH FX TOUCH

TENERGY 05 FX combines High Tension technology with a version of Spring Sponge that produces a softer feeling and a straighter trajectory. It is the result of extensive research and one of many experiments carried out by the Butterfly Research Centre, its name deriving from pimples code 05. TENERGY 05 FX is the perfect solution for players who are seeking to play heavy topspin strokes, whilst maintaining control.

1.7 | 1.9 | 2.1

€ 59.90

TENERGY 25

FOR MAXIMUM PRECISION

TENERGY 25 uses pimples that enable fast counter attacking play; they have been appraised to be best for attacking and precise play close to the table. TENERGY 25 is perfect for play both close to the table and at mid distance; experience the advantage of aggressive play close the table and rapid counter attacks.

1.7 | 1.9 | 2.1

€ 59.90

TENERGY 64

FOR MAXIMUM CONTROL AND SPEED

TENERGY 64 possesses the ultimate in elasticity of High Tension technology. Pimples code no. 64 combines to produce the feeling of being able to hold the ball on the racket for longer, thus achieving a longer contact. TENERGY 64 enables a player to exercise control and then attack with speed.

1.7 | 1.9 | 2.1

€ 59.90

TENERGY 80

FOR MAXIMUM BALANCE

TENERGY 80 balances spin and speed at the highest level in the TENERGY series. Pimples with code 180 were adopted for this rubber, having been developed to make more balanced play possible. TENERGY 80 enables allround topspin play, attack and counter attack for every playing style.

1.7 | 1.9 | 2.1

€ 59.90

TENERGY 25 FX

PRECISION WITH FX TOUCH

TENERGY 25 FX has pimples with a larger diameter which, when combined with a Spring Sponge, produce a softer feeling. TENERGY 25 FX enables the player to execute topspin shots with increased passive control, especially when counter attacking close to the table.

1.7 | 1.9 | 2.1

€ 59.90

TENERGY 64 FX

MAXIMUM CONTROL WITH FX TOUCH

TENERGY FX produces great control without losing its high level of performance. TENERGY 64 FX combines speed and control and comprises a top sheet with pimples from development code no. 64. TENERGY 64 FX uses a lighter version of Spring Sponge but still enables controlled topspin to be executed.

1.7 | 1.9 | 2.1

€ 59.90

TENERGY 80 FX

FOR BALANCE WITH FX TOUCH

TENERGY 80 FX is the perfect addition to TENERGY 80 family. The patented Spring Sponge is made 4° softer which allows for more feedback on touch as well as increased passive control.

ROZENA

HIGH PERFORMANCE RUBBER DEVELOPED IN THE PURSUIT OF "TOLERANCE"

ROZENA, a rubber equipped with the world stunning Spring Sponge; its feature is high tolerance realized thanks to the combination of Spring Sponge dyed in rose with a newly-developed top sheet. The unique High Tension technology developed by Butterfly enables powerful strokes to be exerted as well as a high level of consistency in play created by compensating for the delicate errors such as blade angle and direction. ROZENA follows the quality of legendary predecessors by demonstrating its effectiveness in plays close to the table or at mid-distance.

MICROLAYER
HIGH TENSION

BRYCE HIGHSPEED

THE FASTEST RUBBER IN THE HISTORY OF BUTTERFLY

The new powerful rubber from Butterfly, using innovative and patented "Micro Layer" technology, giving the BRYCE HIGHSPEED a much thinner surface structure compared to other rubbers. As a result, compression of the rubber is increased on ball impact, providing additional grip and spin. BRYCE HIGHSPEED is well suited for ambitious players looking for a high-powered rubber.

1.7 | 1.9 | 2.1

HIGH TENSION

SPIN ART

GENERATION SPIN

SPIN ART is the first High Tension rubber produced by Butterfly with a high level of friction; it has a "tacky" surface with a high level of friction which makes it ideal for heavy spin; the "Spring Sponge" enables the rubber to grip the ball. SPIN ART maintains the ball control realized by traditional "tacky" rubbers.

1.7 | 1.9 | 2.1

€ 54.90

HIGH TENSION

ROUNDELL

FULL CONTROL WITH HIGH TENSION

Developed in order to increase a player's potential. The speed and spin created by this High Tension rubber as well as the high level of control, is made possible through the combination of a soft top sheet in harmony with advanced sponge.

1.7 | 1.9 | 2.1

€ 34.90

HIGH TENSION

ROUNDELL HARD

CONTROLLED OFFENSIVE WITH HIGH TENSION

ROUNDELL HARD combines overwhelming speed and spin, with outstanding control, enabling dynamic attacking strokes and delicate returns to be played with equal success. The flexible top sheet combined with a hard sponge produces a distinctive sound.

1.7 | 1.9 | 2.1

€ 34.90

HIGH TENSION

ROUNDELL SOFT

MAXIMUM CONTROL WITH HIGH TENSION

ROUNDELL SOFT represents a new generation of High Tension rubbers, having a soft and pliable sponge which is ideal for fast attacking play and high levels of spin. ROUNDELL SOFT provides the player with an excellent feeling for the ball.

1.7 | 1.9 | 2.1

€ 34.90

SRIVER

LEGENDARY BESTSELLER

SRIVER is the rubber synonymous with high elasticity and high friction; when released in 1967 it changed the face of table tennis. For over 40 years, SRIVER has been the market leader and the choice of players who have won a host of world titles as a result of its exceptional combination of speed and spin.

1.3 | 1.5 | 1.7 | 1.9 | 2.1 | max

€ 34.90

SRIVER EL

LEGENDARY TALENT

Soft but not too soft: the main feature of SRIVER EL is its totally balanced combination of instant power and control which is realised by its unique sponge. SRIVER EL is the choice of a wide range of players from beginners to experts.

1.7 | 1.9 | 2.1 | max

€ 34.90

SRIVER FX

LEGENDARY TOUCH

SRIVER FX was produced as a result of searching for a rubber with better control and stability, whilst maintaining the speed and spin of SRIVER. A softer sponge provides great control and is recommended for players who exercise controlled play close to the table whilst seeking the chance to attack.

1.5 | 1.7 | 1.9 | 2.1 | max

TACKINESS CHOP

GRIPPY RUBBER FOR DEFENSIVE PLAY

TACKINESS CHOP is a long-time seller which has always been popular with defenders. It is recommended for players who aim to impart heavy backspin on the ball when returning top spin strokes.

1.1 | 1.3 | 1.5 | 1.7 | 1.9

€ 34.90

TACKINESS CHOP II

DYNAMIC DEFENSE

TACKINESS CHOP II is the advanced version of TACKINESS CHOP which has been popular amongst defenders for many years. Due to the high levels of friction from the playing surface, heavy spin can be imparted. This rubber has been designed exclusively for defenders; it enables heavy backspin to be imparted on the ball and is also effective for attacking play.

1.1 | 1.3 | 1.5 | 1.7 | 1.9

€ 36.90

TACKINESS DRIVE

FAMOUS CLASSIC

The rubber is popular amongst a wide range of players and is a longtime seller famed for its versatility. It is suitable for a wide range of players, both attackers and defenders.

1.3 | 1.5 | 1.7 | 1.9 | 2.1

€ 34.90

FLEXTRA

IDEAL FOR BEGINNERS

FLEXTRA provides beginners and intermediate players with a rubber which reduces mistakes, giving them a good basis to develop a safe play. Durability is just one of the rubber's characteristics.

€ 21.90

FEINT SOFT/FEINT OX

CLASSICAL LONG PIPS

A long pimpled rubber recommended for attacking play close to the table and for defenders who rely on consistency. A strong first attack is possible regardless of the spin on the ball that has been returned.

FEINT OX is suitable for both attacking and defensive play.

1.1 | 1.5

€ 31.90

without sponge (OX)

€ 31.90

HIGH TENSION

FEINT AG

LONG PIPS FOR ATTACK

For players using long pimpled rubber, the ability to attack has become increasingly important. High Tension long pimpled rubber enables returns to be made with both minimal spin and strong attacking play.

1.3 | 1.7

€ 47.90

FEINT LONG III

VERSATILE LONG PIPS

The height and hardness of the pimples were cleverly designed in order to bend in an ideal way for imparting the desired level of spin. It is recommended for defenders who wish to return balls using heavy backspin and for attacking players seeking variation.

0.5 | 1.1 | 1.3 | OX

€ 39.90

FEINT LONG II

STABLE LONG PIPS

The rubber possesses a wide range of spin and the consistency that defensive players demand. The aspect ratio of this rubber was designed to gain the greatest effect.

€ 36.90

HIGH TENSION

IMPARTIAL XS

OFFENSIVE SPIN-ORIENTED SHORT PIPS

The new IMPARTIAL XS short pips rubber supports dynamic and spin oriented play: its specially designed pimple structure and the flexible high tension sponge can produce high amounts of spin and speed. The IMPARTIAL XS is recommended for players looking for the increased passive control of a short pips rubber with the ability to create spin in offensive situations.

1.7 | 1.9 | 2.1 | max

€ 49.90

HIGH TENSION

IMPARTIAL XB

OFFENSIVE SPEED-ORIENTED SHORT PIPS

The new IMPARTIAL XB rubber uses a harder pimples structure, combined with the High Tension sponge. It supports passive block shots as well as offensive play focused on speed. The IMPARTIAL XB rubber is recommended for a direct offensive playing style close to the table.

1.7 | 1.9 | 2.1 | max

€ 49.90

HIGH TENSION

FLARESTORM II

HIGH SPEED PIPS

Increased speed is the most striking characteristic of FLARESTORM II when compared with the former version of FLARESTORM. The low trajectory and the fast speed will meet all you expect from pimples-out rubber.

1.7 | 1.9 | 2.1 | max

€ 49.90

CHALLENGER ATTACK

ALLROUND ATTACK PIPS

In addition to the high tempo attacking play, this rubber enables a player to seize the advantage with a variety of spin. It is best suited for all-round play.

1.5 | 1.7 | 1.9 | 2.1

€ 34.90

ORTHODOX DX

THE CLASSIC

The rubber gives consistency. It can be handled with ease.

without sponge (OX)

€ 19.90

SUPER ANTI

TRADITIONAL ANTI SPIN

The rubber enables a player to outwit opponents without imparting spin on the ball; returns can be made with or without spin.

1.5 | 1.9

€ 26.90

RUBBER TECHNOLOGIES

HIGH TENSION

High Tension technology augments the reaction and spin potential of rubbers by increasing tension inside the sponge and rubber surface.

Spring Sponge

Spring Sponge technology increases flexibility of the sponge. Like a coil spring, the Spring Sponge absorbs the incoming energy of the ball and releases it as additional power for the player's own shot. Rubbers with Spring Sponge technology enable shots with high amounts of spin.

MICROLAYER

BRYCE HIGHSPEED is a rubber that enables heavy top spin to be imparted without losing speed. It has been developed thanks to Micro Layer, newly developed by Butterfly. The base of the top sheet is very thin, visible to the naked eye. The rubber compresses and the surface is "depressed" by the ball on impact; thus enabling a high degree of rotation to be imparted on the ball. A simple pimple shape was selected from a wide range of options to create the best possible product for speed.

BUTTERFLY RUBBER MATRIX

ISOTYPE FOR RUBBERS

Speed

The measure for speed of SRIVER is 10.

Spin

The measure of spin for TACKINESS CHOP is 10.

HARDNESS

It refers to the sponge; the higher the number, the harder the sponge.

The numbers are based on the research conducted by the Butterfly Research and Development Department in January, 2015.

THE HIGH-REACTION AREA HAS BEEN EXPANDED

The image on the left is the averaged data based on the comparison between ZL-Carbon and Super ZL-Carbon combined within a wide variety of materials made from wood. The "high-reaction area" is the area where the measured figures were above a certain level in reaction testing (less energy loss in the area). We had no measurement in the area in black.

ZHANG JIKE SUPER ZLC

THE ULTIMATE FEELING – PROVEN BY THE MASTER

ZHANG JIKE SUPER ZLC – made with Butterfly's unique composition, uniting the speed of carbon with the lightness and flexibility of ZL-Fiber. The blade is controlled and fast, but also creates a fantastic touch for the ball when generating spin. A whole new way of experiencing table tennis! The blade carries the name of the World Champion, Olympic Champion and table tennis Superstar Zhang Jike. Its intricate design, the quality of materials and the detailed workmanship really speak for themselves. This is a premium table tennis blade in its own class.

5-ply + 2 SZLC

ZLCARBON *Innerfiber*

INNERFORCE LAYER ZLC

INNERFORCE EXPERIENCE WITH ZL-CARBON

The INNERFORCE LAYER ZLC blade offers a completely new experience - its carbon fibers are located closer to the core which makes the overall blade feel softer without losing the ZL-Carbon characteristics such as lightness, flexibility and speed.

5-ply + 2 ZLC

€ 199.90

10.5 REACTION	FL	157 × 150 mm	5.7 mm	100 × 24 mm	34 mm

	CS	161 × 150 mm	5.7 mm	82 × 24 mm	32 mm

Arylate-CARBON *Innerfiber*

INNERFORCE LAYER ALC

INNERFORCE EXPERIENCE WITH ARYLATE-CARBON

The Arylate-Carbon fibers are located closer to the core, which lends the blade a softer touch and a stunning feel for the ball. Arylate-Carbon fibers dampen vibrations and allow for dynamic play and precise placement.

5-ply + 2 ALC

€ 149.90

10.7 REACTION	FL	157 × 150 mm	6.0 mm	100 × 25 mm	34 mm

5 PLY	AN	157 × 150 mm	6.0 mm	100 × 25 mm	34 mm

Innerfiber

Our Innerforce Layer series offers the experience of "holding the ball". The artificial fibers are applied directly above the wooden core, keeping the original fiber characteristics of the blade, but providing a softer touch which translates into an improved, controlled feeling in all situations.

ALC BLADE WITH INNERFIBER

REGULAR ALC BLADE

**ARYLATE
CARBON**

BUTTERFLY CARBON-FIBER TECHNOLOGIES

The regulations of the International Table Tennis Federation state: "At least 85% of the blade by thickness shall be of natural wood." In other words, we may adopt any special materials for the remaining 15% for reinforcement. However, no high-performance rackets will be produced only by attaching some special materials without analysis; balance is crucial to make the best product. Butterfly will continue to research materials that best suit the techniques of future generations as well as continually improving the quality of the blade.

New processing techniques allow a stronger link between carbon and ZL-Fiber, leading to a blade with very little energy loss on the edges and a bigger and more homogenous sweet spot thus accentuating the strengths of ZLC blades even more. Blades with SUPER ZLC fibers are fast with a very precise touch and produce a fantastic feeling for any spin play.

Linking ZL-Fibers and carbon increases the stability and stiffness of the blade and results in a bigger sweet spot and less energy loss around the edges. ZLC blades are usually stable and fast with a harder touch that allows very precise play as well as spinny top spins.

ZL FIBER

ZL-Fiber is a remarkably thin and hardened material lending speed, lightness and a homogenous bounce to the blade. Blades with ZLF are commonly known for their lightness and controlled, soft touch.

Arylate-CARBON

Arylate-Carbon is a fiber used in many popular Butterfly blades and is used to produce stability and precision without affecting the weight of the blade. ALC blades have a softer touch and are best suited for versatile spin play.

TAMCA 5000

TAMCA 5000 is a carbon fiber, enhancing stability and flexibility of a blade, enabling the production of fast and dynamic blades. Usually, T5000 blades are fast, direct and precise with a medium to hard touch.

HADRAW VR

HIGH CLASS OFFENSIVE BLADE WITH WENGE

Compared to the softer VK, HADRAW VR features a higher reaction and vibration property. Besides the beautiful finish, the Wenge wood used in its outer veneers provides a more direct, more dynamic touch, resulting in an offensive offset and higher precision.

5-ply

€ 109.90

5 PLY	AN	157 × 150 mm	5.9 mm	100 × 25 mm	34 mm

HADRAW VK

CLASSIC OFFENSIVE

Fans of classic offensive blades feel right at home with the new HADRAW VK blade. The 5-ply blade offers security and a controlled touch, typical to all-wood blades. HADRAW VK is best suited for versatile offensive play, similar to the KORBEL SPEED blade.

5-ply

€ 89.90

10.5 REACTION	FL	157 × 150 mm	5.7 mm	100 × 24 mm	34 mm

7 PLY	AN	157 × 150 mm	6.6 mm	100 × 24 mm	34 mm

HADRAW SK

CLASSIC ALL-WOOD BLADE

HADRAW SK is a 7-ply blade made from natural wood. In comparison to the popular KORBEL SK7, the HADRAW SK features a lower reaction property and a softer, yet stiff touch, making it easier to control.

7-ply

€ 89.90

10.0 REACTION	FL	157 × 150 mm	6.4 mm	100 × 24 mm	34 mm

MAZE PERFORMANCE

A DIFFERENT APPROACH TO NATURAL WOOD

The brand new MAZE PERFORMANCE uses harder layers of wood and features a high vibration property for an all-wood blade. It is suited for precise offensive play and recommended to players looking for a moderately offensive blade without the use of artificial fibers.

5-ply

€ 79.90

Only available in FL.

BOLL FORTE

BALANCING THE CORE

The BOLL FORTE blade allows for a maximum of precision and stability. Its relatively soft core combined with strong outer veneers provide control for a dynamic and powerful play.

Butterfly Coach Richard Prause: "For offensive players who look for great dynamics when executing topspins as well as good feedback within passive play."

5-ply € 49.90

	FL				
	ST				
	AN				

BOLL OFFENSIVE

A STEP FORWARD

Using a specialized glueing technique, the medium hard BOLL OFFENSIVE allows for a controlled and precise bounce and suits all attacking plays.

Butterfly Coach Richard Prause: "Ideal for variable offensive play with particular focus on service and return game as well as high quality in opening topspins."

5-ply € 39.90

	FL				
	ST				
	AN				

BOLL ALLROUND

SUCCESSFUL EVERYWHERE

The BOLL ALLROUND blade provides control and makes it a perfect companion for a variable allround and topspin play. Also available with smaller handle (XXS version).

Butterfly Coach Richard Prause: "The specially long dwell time of this rather soft and versatile blade provides the players with an excellent feedback and feeling for the ball."

5-ply		€ 36.90 XXS € 31.90

REACTION PROPERTY

The Reaction Property is the quantified value illustrating the base speed of a blade. A low reaction property signifies a lower speed of the ball after contact with the blade. A high reaction property signifies a higher speed of the ball after impact.

VIBRATION PROPERTY

The Vibration Property is the quantified value illustrating the feeling of a blade on impact. A low vibration property in general signifies slower vibration on ball contact and denotes a blade with a softer touch. A high vibration property in general signifies faster vibration of the blade on contract with the ball and denotes a blade with a harder touch.

LEZOLINE

RIFONES

FULLY LOADED FOR PROFESSIONAL DEMANDS

The LEZOLINE RIFONES is the all-new flagship model of the popular LEZOLINE series and has been designed to meet the demands of modern high-performance table tennis. Its multitude of useful technologies like the "STB" Torsion protection", the "B-Armor" reinforcement, the "B-Absorber" shock absorbing material or the durable, yet grippy "Wingrip" outer sole make LEZOLINE RIFONES the ideal companion for high-level table tennis. Stars like Timo Boll, Jun Mizutani or shooting star Tomokazu Harimoto already rely on LEZOLINE RIFONES and value its high quality and durability.

1950 CASE

FIRST EDITION

BUTTERFLY 1950 CASE - FIRST EDITION

UNIQUE, CLASSY, OUTSTANDING

Instead of Aluminum or Polyester, the exclusive Butterfly 1950 CASE uses naturally growing cork material, underlining the growing importance of using renewable resources in table tennis and sports in general.

The 1950 CASE features outstanding workmanship and high-quality material, such as the veneer made of lightweight, yet sturdy spruce wood. A magnet strip, hidden inside the case, safely connects the 1950 Case with its lid. The robust cork material is water resistant and provides excellent thermal isolation, keeping the racket both safe and in playing condition at all times.

The unique design of the high-quality case is rounded off by a precise laser engraving on the lid. The 1950 CASE - made in Portugal - is a limited edition, each product is unique and sure to appreciate in value.

Material: Cork & Spruce wood

Dimensions: 30 × 5 × 19 cm

ROBOTS & TABLES

AMICUS

THE ALL-NEW AMICUS SERIES FROM BUTTERFLY

Meeting the highest demands of players looking for a reliable, diversified and tireless training partner.

Easy to transport and easy to set up with high quality material and long-lasting usability, the AMICUS family excites players and trainers of all levels of play alike. The

unique head with three shooting wheels enables a most realistic play, combining all types of spins. Supported by the user-friendly interface and a practical transport bag, the AMICUS is a perfect companion to train and improve.

More infos & videos: [EN.BUTTERFLY.TT/AMICUS](https://en.butterfly.tt/amicus)

ALL MODELS INCLUDE:

- 3-wheel technology produces all spins with no head rotation—topspin, backspin, no-spin, left sidespin, right sidespin, combination spins.
- Special coating on wheels for longer life
- 3 random modes to make ball deliveries more human-like—Random Scatter, Random Place, and Random Scatter + Place.
- Adjust head height to 4 levels to better replicate various table tennis shots.
- Covered by 2-year warranty and 5-year guarantee of parts availability
- Silent Mode—motors stop when ball delivery is stopped.
- Can use either 40 (celluloid) or 40+ (plastic) balls.
- Includes easy-on folding ball recycling net for continuous play.
- Lightweight and compact for easy handling and transport.
- Control Panel Mounting Bracket is adaptable to fit either the left or right side of the table.
- Includes Wheel Adjustment Gauge and other tools for adjusting or replacing wheels, and replacement rubber bands used to attach the Side Nets.
- Spacious and practical Amicus transport bag included free of charge
- 2-year manufacturer's warranty

AMICUS PRIME

THE NEW AMICUS PRIME SETS OUT TO REDEFINE THE POSSIBILITIES OF A TABLE TENNIS ROBOT AND WILL EXCITE FANS ALL OVER THE WORLD

The innovative PRIME is controlled wirelessly via Bluetooth technology from the AMICUS app running on either the included tablet computer or any smartphone or tablet operating iOS or Android. AMICUS app software offers a multitude of interactive content, improved and added to with regular updates. Creating exercises, changing spin, speed, placement and trajectory has never been easier. Pre-saved exercises created by professional players and coaches are playable at the press of a button with in-app videos by stars such as Timo Boll just waiting

to show the correct execution and provide useful additional information from his regular training with the AMICUS robot.

Get acquainted to our AMICUS flagship model and discover the new possibilities of the most tireless, and always ready, training partner you will find.

Including AMICUS transport bag

€ 1799.00

SPECIAL FEATURES OF AMICUS PRIME:

- Ball frequency of up to 120 balls per minute
- Spin, speed, trajectory and placement can vary from ball to ball.
- Controlled by the application on tablet (or user supplied Android or iOS device) and connected wirelessly to main robot via Bluetooth.
- Software and firmware regularly updated with help of the app.
- Several robots may be operated by one device (consecutively).
- Device can be recharged directly at the robot.
- Left-Right (mirror) switch for reversing drills to match the dominant hand of the user so forehand/backhand placement are correct.
- Sample function to test individual balls within a drill.
- Individual Frequency Control can customize the time interval between any two consecutive balls.
- Cycle function lets you easily incorporate interval training in your table tennis practice sessions.
- Pre-programmed with 20 drills created by German Butterfly Coach Richard Prause
- Pre-programmed drills can be modified or replaced.
- Integrated videos show how to properly practice each pre-programmed drill.
- Memory for storing drills limited only by memory of the device used to run the app.
- You may sequence together several drills by using Cluster Memory so a sequence of drills runs automatically either one after the other or randomly.
- Key-fob-like remote control (small, lightweight and easy to fit in pocket)

AMICUS EXPERT

The new AMICUS EXPERT combines the skills of both predecessors ADVANCE and PROFESSIONAL. With 99 memory slots, up to seven individual balls per exercise and precise control over trajectory, placement, speed and spin of each ball, AMICUS EXPERT further features up to 120 balls per minute, cycle and random functions as well automatic adjustable delay between each ball to create exercises based on real game situations – even with serve!

AMICUS EXPERT offers 20 pre-installed exercises created by Butterfly coach Richard Prause for you to start training on the highest level as well as a remote control for Start/Stop, sampling balls and adjusting ball frequency.

- Left-right Placement can change for each ball in a drill.
- Connected with help of an easy and secure thin cable.
- Optional: Key-fob-like remote control (small, lightweight and easy to fit in pocket).

CENTREFOLD 25

25+ SURFACE – FULLY ASSEMBLED – SUPER COMPACT SYSTEM

Our top of the range table is the Butterfly CENTREFOLD 25. It has been selected for the World Championships and many other international and national competitions.

Its main advantage is the 25+ top (see further information). The undercarriage is one of the strongest available. It incorporates 4 large Steinco 125mm strong wheels, 2 of which have brakes. This guarantees both firm standing and easy movement. Transportation and storage is easy with the unique space saver system which makes folding and rolling the table simple and safe. The table tops fold together at the centre, reducing the width in the storage position to only 20 inches or 51 centimetres. A unique easy to use safety system prevents the table from opening and closing accidentally. A perfectly level playing surface is achieved by use of the height adjusters on all four of the end legs.

The CENTREFOLD 25 table is one of the few top match models which is wheelchair friendly. The distance between the end of the table and the first leg is 400 mm to meet the standard required for paraplegic competitions. The CENTREFOLD 25 is approved by the International Table Tennis Federation for use in competitions, has a European Safety certificate (EN 14468-1) and is guaranteed for 5 years.

Storage dimensions: width 1525 mm, height 1590 mm, depth 480 mm

OUR SPECIAL PRODUCTION - NOW IN MASS PRODUCTION

After extensive tests, Butterfly has developed the new 25+ surface, optimised to the demands of the new poly balls. The finer grain allows a more direct spin transmission and provides a homogenous bounce whilst being even more durable. This technology is already established in professional table tennis and enables the experience of playing at the highest level. Available with: **CENTREFOLD 25, OCTET 25, EUROPA 25**

ITTF approved

5 years guarantee

wheelchair friendly

ready assembled

OCTET 25

25+ SURFACE – VERSATILE – SPACE SAVING

The OCTET 25 mm is a top competition table that provides all the benefits of the 25+ top combined with an undercarriage with 2 separate halves and 8 wheels - four of them with brakes. The OCTET 25 is suitable for high level play in clubs, sports centres, schools and at major events.

The principle feature of this table is the 25+ top (see further information on page 101). The top is protected by a strong steel frame with magenta corner pieces and supported by a heavy duty undercarriage. A perfectly level playing surface is archived by use of the height adjusters on all four of the corner legs. The OCTET 25 divides into two halves, both fold for easy movement and storage. Each half has four strong independent Steincow wheels. The table stores away economically with the two halves fitting together. The total width of the table for storage is only 63 cm. For multi table use the tables can be rolled together for even more compact storage. Another popular feature of the table is the playback facility where one half can be set in the storage position, the other in the play position with the net and post set in place.

The Butterfly OCTET 25 is International Table Tennis Federation approved, and holds a European safety (EN 14468-1) certificate.

Storage dimensions: width 1525 mm, height 1630 mm, depth 560 mm

EUROPA 25

25+ SURFACE – FULLY ASSEMBLED – EASY TO TRANSPORT

The Butterfly EUROPA 25 mm table has been selected for many international tournaments throughout the world over the last 20 years. It is most suitable for clubs where the tables stay in position permanently or where storage is very limited.

It is also the best table for competitions where the equipment needs to be moved from one venue to another. Its principle feature is the 25+ top (see further information on page 101). The top is protected by a strong steel frame with magenta corner pieces. The table is supplied in two halves, with each half having four steel legs which make the table very solid and stable. The legs fold easily into the top for economic storage. This table takes up the minimum space for storage – 15 cm in width. Each half has two wheels inserted into the centre so that the table can be rolled away.

The EUROPA 25 is approved by the International Table Tennis Federation and holds a European Safety certificate (EN 14468-1).

Storage dimensions: width 1525 mm, height 1390 mm, depth 150 mm

SPACE SAVER 22

ITTF APPROVED – PERFECT GRIP – FULLY ASSEMBLED

The Butterfly SPACE SAVER 22 is one of the most popular match tables in the Butterfly range. It is suitable for tournament and club play, being in use at hundreds of clubs, sport centres and schools.

The high quality 22mm "Perfect Grip" top is protected by a strong steel rim and supported by a steel undercarriage which has 4 wheels, 2 of which that have brakes for use in the playing and storage positions. A perfectly level playing surface is guaranteed with height adjusters on all four legs. Transportation and storage is easy with the unique SPACE SAVER folding system which makes folding and rolling the table away simple and safe. The tops fold together at the centre, reducing the width for storage to on 56 cm. A unique safety system prevents the table from opening and closing accidentally. The Butterfly SPACE SAVER 22 is one of the few match tables which is wheelchair friendly. The distance between the end of the table and the first leg is 400 mm to meet the standard required for paraplegic competitions.

The SPACE SAVER 22 is approved by the International Table Tennis Federation for use in competitions. It has a European Safety Certificate (EN 14468-1) and is guaranteed for 5 years.
